Prototyping the solution

Turn your ideas into realistic models you can test
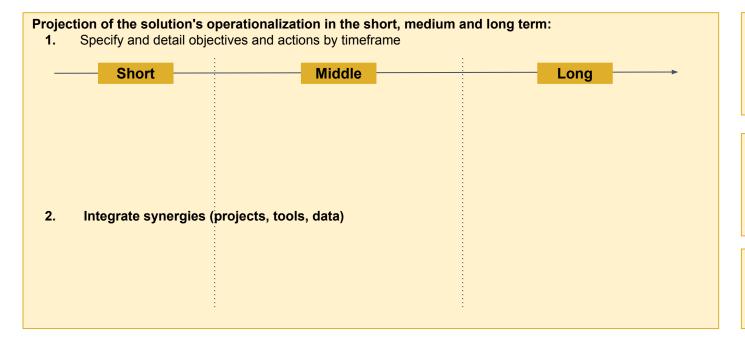

Solution prototyping – operationalization canvas

Name of solution |

Does the solution require integration into an existing roadmap? Specify and detail

Is the solution a single project, or does it need to be divided into several projects? Specify and detail

Projection of the solution's operationalization in the short, medium and long term:
1. Specify and detail objectives and actions by timeframe

| Short | Middle | Long |

2. **Integrate synergies (projects, tools, data)**

Are any upstream transformations required to implement the solution? Specify and detail

What are the different directions to take on board?
