Online tools

Collaboration and connectivity are essential to project success, making the use of collaborative online tools indispensable. These tools enable efficient teamwork, overcoming the barriers of distance and availability.

Mapping the main tools by function

Depending on your project, you may have a number of different needs. In addition to the mapping of the main generalist tools opposite, other more specific resources are available in this article: click here.

In particular,:

o Brainstorming with your team: Slack, Miro, Klaxoon

o Prototyping: Figma has a comprehensive free version.

o Graphics (design, photos, video): Canva

o Presentation site / landing page: WIX
